

Dear Hiring Manager,

I am writing to express my interest in the Software Engineer position at your organization. I am currently pursuing a Bachelor of Technology in Computer Science Engineering at Aditya College of Engineering and Technology and have built a strong foundation in Python, SQL, HTML, CSS, JavaScript, Django, Flask, FastAPI, MySQL, and SQLite.

Through my academic projects, I have gained practical experience in designing and developing web applications. One of my major projects, the Staff Leave Management System, involved implementing role-based authentication, CRUD operations, database management, and RESTful application development using Django. I also developed a Fake Aadhaar Detection system using Python, OpenCV, OCR, YOLOv8, and Flask to detect forged identity documents through image analysis and machine learning techniques.

In addition to my project experience, I have solved over 200 SQL problems, contributed more than 4,000 GitHub commits, and actively participated in collaborative development through pull requests and version control using Git. These experiences have strengthened my problem-solving, debugging, and software development skills.

I am a quick learner, passionate about building efficient software solutions, and eager to contribute to a dynamic development team. I am confident that my technical skills, dedication, and willingness to learn will enable me to make a valuable contribution to your organization.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and enthusiasm align with your team's needs. I look forward to hearing from you.

Sincerely,

Abbireddy Venkata Chandu
