

SKILLS

Programming Languages: Python, SQL, JavaScript
Frontend: HTML5, CSS3, JavaScript, Bootstrap
Backend: Django, FastAPI, Flask, REST APIs, Django ORM
Databases: PostgreSQL, MySQL, SQLite
Core Concepts: Object-Oriented Programming, CRUD Operations, Authentication, Authorization, Session Management, ORM, Query Optimization
Tools & Deployment: Git, GitHub, Postman, Visual Studio Code, Render, Vercel, GitHub Pages

EDUCATION

Aditya College of Engineering and Technology Aug 2022 – Jun 2026
Bachelor of Technology in Computer Science Engineering — 7.50 CGPA Surampalem, Andhra Pradesh
Coursework: Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks

TECHNICAL HIGHLIGHTS

- Solved **200+ SQL problems** covering joins, subqueries, CTEs, window functions, indexing, views, normalization, and query optimization.
- Applied core Python concepts including object-oriented programming, exception handling, file handling, decorators, generators, regular expressions, multithreading, and database operations.
- Recorded **4,000+ GitHub contributions** and completed **20+ pull requests**, practicing branching, merging, rebasing, and conflict resolution.
- Developed **3 end-to-end projects** spanning Django, FastAPI, Flask, REST APIs, computer vision, OCR, authentication, databases, and GitHub API integration.

PROJECTS

Staff Leave Management System | [Live Demo](#) Mar 2026 – Apr 2026
Django, Python, JavaScript, HTML5, CSS3, Bootstrap, PostgreSQL, Django ORM, Git

- Implemented role-based authentication and authorization for **2 user roles — Admin and Staff**, securing access across leave-management workflows.
- Designed Django ORM models supporting **500+ records** covering employee profiles, leave requests, approvals, status tracking, and reporting.
- Engineered CRUD, search, filtering, validation, and approval workflows and tested application functionality across **200+ users**.

Aadhaar Fraud Detection | [Live Demo](#) Dec 2025 – Apr 2026
Python, Flask, YOLOv8, Tesseract OCR, Computer Vision, QR Code Detection

- Developed an automated Aadhaar verification pipeline combining OCR, QR-code detection, image preprocessing, and pattern-based validation for identity verification.
- Applied computer-vision techniques to process document images and extract relevant identity information using Tesseract OCR and YOLO-based detection.
- Integrated document validation and image-forensics checks to identify inconsistent or potentially manipulated Aadhaar information.

GitHub Profile Analyzer | [Live Demo](#) Dec 2025
Python, FastAPI, REST APIs, GitHub API, JavaScript, HTML5, CSS3, Ollama

- Engineered a full-stack GitHub profile analyzer evaluating repository activity, documentation, visibility, community impact, and profile completeness.
- Implemented FastAPI endpoints with GitHub API integration and separated deterministic profile scoring from optional AI-assisted recommendations.
- Added automated drawback detection and recruiter-focused recommendations for improving repository quality, project visibility, and profile completeness.

CERTIFICATIONS

- SQL (Intermediate) Certificate** — HackerRank
- Software Engineer Certificate** — HackerRank
- Version Control Certificate** — LinkedIn Learning
- Python Full Stack Certification** — Dhee Coding Lab

ACHIEVEMENTS

- Earned **Pull Shark x2**, YOLO, Pair Extraordinaire, and Starstruck GitHub badges through repository activity.
- Completed **20+ GitHub pull requests** involving software development and repository contributions.
- Recorded **4,000+ GitHub contributions** through software development projects and open-source activity.
